

Spotlight in INDUSTRY

Kevin Short, long time roll tooling and tube mill expert for Western Tube and Conduit in California, has been faithfully tracking tube mill tooling footage on his tube and pipe mills for years. Now, ever since he bought the first set of **RMTS SUPER ROLL** tooling, footage increased dramatically between regrinds. "This is the only major improvement in the tube industry for years and it's about time! With new tube mill speeds increasing, we needed longer lasting tooling to bridge the gap. These **RMTS SUPER ROLLS** really work, and the boys at RMTS are the real deal. What I like about these guys is they are all x-tubers and understand my problems. These come out with something new all the time, and the best part is they do exactly what they say they are going to do." Kevin Short has been with Western Tube and Conduit for 25 years.
