March 1, 2010

Dear Joe,

Just a note to inform you that the **"SUPER ROLL"** is the finest **Tube & Pipe Tooling BAR NONE**. My footage between regrinds has increased some 300%. That equates to \$20,000 - \$30,000 savings from regrinding. The bore wear and face wear is almost non-existent and our shafts are lasting much longer too. Thanks, it's about time someone has made extended life Tube & Pipe Mill Tooling.

And speaking of long lasting tooling, the **SLITTER BLADES** are working out terrifically. Your processes have made our blades last the longest that ever have. They continually hold their edges when running higher volumes and speeds and we are experiencing very little cracking. Your process of turning these is working out much better than the old way of grinding. **The money savings is monumental.** Thank you for the good work and for continuing to save us money.

Sincerely,

Bill Veri
Chairman of the Board

"The money savings is Monumental" -
