Rick Olson, President  
Roll Machining Technologies & Solutions

Dear Rick,

Good Morning and how are you?

It has been awhile since we last talked. I wanted to drop you a note regarding a conversation I recently had with an overseas customer relative to your SUPER-ROLL tooling. He went on to say that your new technology tooling – SUPER-ROLL – was the longest last roll tooling between regrinds that he has tried – and he has tried them all.

He said, and I quote “My tubing footage has increased by 300%, which relates to \$15,000 - \$25,000 per years savings”. It is about time the technology for longer lasting rolls has been addressed.

All the best,

Peter Chifo, Jr.  
President
